After the Disabled Fest you will attend a press conference for local media, and you will appear in the project video that we will show in the Festival's website and all the official webpages of partner organizations.

We want to share with the world your commitment and to say thank you to you.

# *Our aim*

ESC PROJECT

N.2019-1-TR01-ESC11-064601

During the Fest we will speak about volunteering among people with disabilities and together find new ways for better involvement. In the end we will develop the new project ideas for the future as well. We are looking forward to have good discussions!

The main goal is the creation of a manual titled "Social Inclusion of disabled people through volunteering". This document will include personal experiences, applied tools and methods, as well as useful information regarding how to recognize cultural events involving people with disabilities, how to manage disabled volunteers and how to motivate youth to volunteer,

*sharing is  
living.*

# *Amazing people*

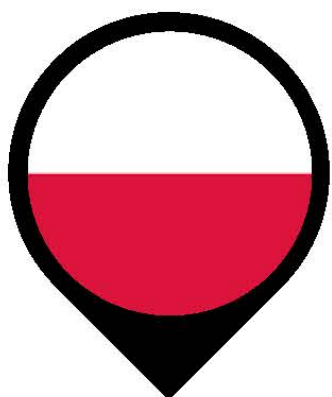

### **3 participants for each country;**

- 1 youth (17-30 years old) open minded and highly motivated. Fewer opportunities, unemployed, facing economic or social challenges, even with low language skills are welcoming. Commitment is the most important.

- 1 disabled person (preferred young). Cognitive and/or physical disability but **unfortunately the accommodation are not suitable for wheelchair.**

- 1 accompanying person (no age limit). Experienced and qualified person to support and accompany disabled people, but also a closed person it would be nice.
